- Check the kneading blade: Ensure that the kneading blade is in good condition and free of any residue. If it appears damaged, consider replacing it.
- Inspect the bread maker: Look for any crumbs or debris in the machine's interior. Use a soft brush or cloth to remove any build-up.

Troubleshooting Common Issues

Even with the best bread makers, issues may arise. Here are some common

problems and their solutions:

1. Bread Not Rising

- Check the yeast: Make sure that the yeast is fresh and has not expired.
- Ensure proper temperature: The water used should be warm but not too hot, as extreme temperatures can kill the yeast.

2. Bread Sticking to the Pan

- Use enough flour: Ensure that the baking pan is adequately floured before adding the dough.
- Consider oiling the pan: Lightly oiling the pan can prevent sticking.

3. Uneven Baking

- Check the ingredient measurements: Accurate measurements are crucial for even baking. Use a kitchen scale for best results.
- Avoid overcrowding: Make sure to leave enough space around the machine for proper air circulation.
