- Stacks up to 8 times, making his auto-attacks increasingly lethal.
- Ideal for extended trades and duels, especially when combined with other abilities.

Q: Leap Strike

- Jax leaps to a target enemy, dealing damage.
- Can be used on minions, monsters, or champions, allowing for mobility in fights.
- If cast on an enemy champion, it resets the cooldown if Jax attacks before using it again.

W: Empower

- Jax's next basic attack deals bonus magic damage and stuns the target if it is used after Leap Strike.
- This ability is essential for maximizing damage output in trades.

E: Counter Strike

- Jax becomes invulnerable to all incoming attacks for a short duration.
- After the invulnerability ends, he stuns surrounding enemies and deals damage based on the number of attacks he dodged.
- This ability is vital for team fights and can turn the tide in skirmishes.

R: Grandmaster's Might

- Jax's passive ability gives him increased damage with every third basic attack.
- This ability is what makes Jax a late-game powerhouse, permitting him to shred through tanks and squishies alike.
