Understanding Contexto

How Contexto Works

1. **Word Selection:** At the start of the game, a secret word is randomly selected from a predetermined list.
2. **Initial Guesses:** Players make their first guess, which is then evaluated against the secret word.
3. **Clue Generation:** Following each guess, the game provides clues that indicate how closely related the guessed word is to the secret word. These clues may reflect semantic similarity, word association, or even phonetic resemblance.
4. **Iteration:** Players continue to make guesses based on the clues until they successfully identify the secret word.

The Importance of Context in Contexto

The game's central theme revolves around the concept of context. Understanding the relationships between words is crucial to achieving success. The clues provided are not merely direct synonyms but often require players to think critically and creatively about word associations.

Understanding the clues provided after each guess is crucial. Instead of simply looking for synonyms, players should analyze the clues for deeper meanings. Here are some tips for effective clue analysis:

- Consider Word Relationships: Think about how words are related. For instance, if the clue is "fruit," consider other words related to fruits, such as "apple," "banana," or "orange."
- Look for Patterns: Identify patterns in the clues. If several clues point toward a specific theme, focus your guesses accordingly.
- Use Elimination: As you gather more clues, eliminate words that are less likely to be the secret word based on the information you receive.
