One of the key strengths of *literary criticism an introduction to theory and practice* Charles E. Bressler lies in its detailed exploration of major literary theories. Bressler presents each framework with attention to its origins, development, and principal concepts, providing a robust foundation for understanding contemporary literary discourse.

Formalism and New Criticism

The book begins by addressing Formalism and New Criticism, focusing on the intrinsic features of literary texts. These approaches emphasize close reading, textual analysis, and the autonomy of the work itself, independent of authorial intent or historical context. Bressler explains key concepts such as the "intentional fallacy" and "the affective fallacy," which discourage reliance on external factors in interpreting literature.

Structuralism and Post-Structuralism

Structuralism introduces the idea that literature can be understood through underlying structures, such as language systems and cultural codes. Bressler outlines the influence of linguistics and anthropology on this theory. Post-structuralism, which challenges the fixed meanings proposed by structuralism, is also thoroughly examined. Concepts such as deconstruction and the instability of language are explored, highlighting the dynamic nature of

interpretation.

Marxist and Feminist Criticism

Bressler dedicates chapters to Marxist and feminist theories, emphasizing literature's social and political dimensions. Marxist criticism analyzes class struggle, ideology, and economic factors within texts, while feminist criticism interrogates gender roles, power relations, and representations of women. These perspectives reveal how literature reflects and shapes societal structures and cultural norms.

Practical Application of Literary Theories
