Maintenance and Care

To ensure that your Logitech MX Master 3S performs optimally, regular maintenance is required. Here are some tips for maintaining your mouse:

- **Keep it Clean:** Use a soft, dry cloth to wipe the surface of the mouse regularly. Avoid using abrasive materials that could scratch the finish.
- **Battery Management:** Charge the mouse regularly to avoid interruptions in performance. The battery life can last up to 70 days on a single full charge.
- **Software Updates:** Check for software updates in the Logitech Options application to benefit from the latest features and improvements.

Troubleshooting Common Issues

If you encounter issues with your MX Master 3S, here are some common problems and their solutions:

1. Mouse Not Connecting:

- Ensure that the mouse is turned on and charged.
- If using Bluetooth, check that your device's Bluetooth is enabled.
- Re-pair the mouse by following the connection steps again.

2. Lag or Delay in Response:

- Check for possible interference from other wireless devices.
- Move the Unifying Receiver closer to the mouse if using that connection method.
- Reset the mouse by turning it off and back on.

3. Button Customization Not Working:

- Ensure that the Logitech Options software is installed and running.
- Check if the mouse is connected to the correct profile in the software.
