- **Convenience:** The three-step process can be done at home and is convenient for busy lifestyles.

The Three-Step System

The Mary Kay Satin Hands system consists of three products that work together to cleanse, exfoliate, and moisturize your hands. Here's a closer look at each product:

1. Satin Hands® Gentle Cream Soap

This creamy soap is designed to cleanse the hands without stripping essential moisture. It contains emollients that help keep hands soft while effectively removing dirt and impurities.

2. Satin Hands® Exfoliating Scrub

The exfoliating scrub is formulated with finely crushed pumice to gently buff away dead skin cells. It also includes a blend of conditioning ingredients that help leave hands feeling silky smooth.

3. Satin Hands® Whipped Cream

This rich and creamy moisturizer provides intense hydration. Its lightweight formula absorbs quickly, leaving hands feeling soft without any greasy residue.

Step-by-Step Instructions for Using Mary Kay Satin Hands

To achieve the best results with the Mary Kay Satin Hands system, follow these detailed instructions:

1. **Start with Clean Hands:** Begin by washing your hands thoroughly with the Satin Hands® Gentle Cream Soap. Squeeze a small amount into your palms and lather up. Rinse with warm water and pat dry with a soft towel.
2. **Exfoliate:** Take a generous amount of the Satin Hands® Exfoliating Scrub and apply it to your damp hands. Gently rub the scrub into your hands, focusing on areas that tend to be rough, such as the palms and knuckles. Rinse off with warm water, making sure to remove all residue. Your hands should feel refreshed and smooth.
3. **Moisturize:** After exfoliating, apply a small amount of the Satin Hands® Whipped Cream to your hands. Rub the cream into your skin, paying extra attention to dry areas. Allow the moisturizer to absorb fully. You can apply this cream as often as needed throughout the day to maintain hydration.

Tips for Maintaining Soft Hands

While the Mary Kay Satin Hands system is highly effective, incorporating additional habits into your routine can help maintain the results and keep your hands looking their best. Here are some tips:

- **Frequent Hand Washing:** Wash your hands regularly, especially after using the restroom or before eating. Use a gentle soap to prevent stripping natural oils.
- **Use Gloves:** When doing household chores or working with harsh chemicals, wear protective gloves to shield your hands from potential damage.
- **Moisturize Regularly:** Keep a tube of Satin Hands® Whipped Cream or a similar hand cream in your bag or at your desk to apply throughout the day.

- **Stay Hydrated:** Drink plenty of water to keep your skin hydrated from the inside out.
- **Exfoliate Weekly:** Incorporate the exfoliating scrub into your weekly routine to maintain soft and smooth hands.

When to Use Mary Kay Satin Hands

The Satin Hands system can be used as needed, but there are specific times when it may be especially beneficial:

- **Before Special Occasions:** Use the system right before a special event to ensure your hands look their best.
- **Seasonal Changes:** As the weather changes, especially during winter months, your hands may become drier. Regular use during these times can prevent dryness.
- **After Manual Work:** If you've been doing tasks that require a lot of handwork, such as gardening or cleaning, pamper your hands afterward.
