1. Apply a pea-sized amount of fluoride toothpaste to the brush head.
2. Turn on the toothbrush and start brushing at a 45-degree angle to your gums.
3. Brush for two minutes, ensuring that you cover all surfaces of your teeth (outer, inner, and chewing surfaces).
4. After brushing, rinse your mouth thoroughly with water.
5. Clean the toothbrush head under running water and store it upright to air dry.

2. Interdental Brushes

Interdental brushes are crucial for cleaning between teeth. Here's how to use them:

3. Gently slide the floss between your teeth, curving it around each tooth in a C-shape.
