Step-by-Step Assembly Instructions

Now that you're familiar with the components and tools, let's get into the step-by-step assembly instructions for your mcage hamster cage.

Step 1: Prepare Your Workspace

Find a clean, spacious area to work on your mcage assembly. Lay out all the parts on a flat surface. This will help you easily identify each component and ensure you have everything you need before starting.

Step 2: Assemble the Main Cage Body

1. Identify the base and walls: Start by locating the base of the cage. This is typically a sturdy, flat piece. Attach the walls to the base by aligning them with the connectors provided.
2. Secure the walls: Use the clips or locks to secure the walls to the base. Ensure that each wall is firmly attached and there are no gaps.
3. Add the top: If your mcage model has a top section or lid, attach it now. Ensure it fits snugly to prevent any escapes.

Step 3: Insert the Removable Tray

The removable tray is a crucial part of the cage as it makes cleaning easier. Follow these steps:

1. Position the tray: Slide the tray into the bottom of the cage. It should fit comfortably without being forced.
2. Check for stability: Ensure that the tray doesn't wobble and is securely in place.

Step 4: Install Ramps and Platforms

Many mcage designs come with ramps and platforms that provide your hamster with climbing opportunities and additional space.

1. Locate the ramps and platforms: Identify the ramps and platforms included in your cage package.
2. Attach the platforms: Position the platforms at various heights within the cage. Most designs will have pre-marked slots for easy attachment.
3. Secure the ramps: Connect the ramps to the platforms and the main cage body. Make

sure they are stable and can support your hamster's weight.

Step 5: Add Accessories

Now that your mcage is assembled, it's time to include essential accessories.

1. Water bottle: Secure the water bottle to the side of the cage, ensuring it's easily accessible for your hamster.
2. Food bowl: Place the food bowl in a corner of the cage, away from the bedding area.
3. Exercise wheel: If your mcage includes an exercise wheel, position it in a place where your hamster can easily access it.
4. Toys and enrichment: Add toys, tunnels, and other enrichment items to keep your hamster entertained.

Step 6: Final Checks

Before introducing your hamster to its new home, perform a final check:

1. Inspect for gaps: Ensure there are no gaps where your hamster could escape.
2. Secure all components: Double-check that all parts are firmly attached and stable.
3. Clean the cage: Wipe down any surfaces with a pet-safe cleaner to ensure a hygienic environment for your hamster.
