Daily Cleaning

After each cooking session, users should empty the ash from the firepot and clean the cooking grates. The manual advises using a grill brush to remove food residues and grease buildup. Emptying the drip tray and wiping down the exterior surfaces prevents corrosion and buildup of grease.

Periodic Maintenance

The manual recommends checking the auger and fan assemblies for blockages or

wear every few months. Lubricating moving parts and inspecting electrical connections are also advised to prevent malfunctions. Replacing worn or damaged parts promptly is essential for safety.

Pellet Storage

Safe Placement and Operation

The grill should be placed on a stable, non-flammable surface, away from combustible materials, structures, and overhangs. The manual warns against operating the grill indoors or in enclosed spaces due to carbon monoxide risks. It also advises keeping children and pets at a safe distance during operation.

Handling Hot Surfaces

Users are reminded that the grill surfaces become extremely hot during operation. The manual recommends using heat-resistant gloves and long-handled tools when handling food or adjusting components. Caution signs and warnings are clearly outlined to prevent burns.
