- Post-Shippuden: Boruto and Beyond

Understanding the Naruto Series

The Naruto anime franchise is a sprawling saga based on Masashi Kishimoto's manga, encompassing multiple series and movies. It follows Naruto Uzumaki, a young ninja with dreams of becoming the strongest leader, the Hokage, while navigating friendships, rivalries, and battles. The series is split primarily into two parts: the original Naruto and its sequel, Naruto Shippuden. Additionally, there are numerous movies and OVAs that expand on the story or provide side stories. Understanding the structure and scope of the franchise is crucial for deciding how to approach watching the series effectively.

Naruto Original Series Overview

The original Naruto series consists of 220 episodes, chronicling Naruto's early years as a ninja-in-training. It introduces the core characters, the Hidden Leaf Village, and the foundational plot elements. The pacing includes many filler arcs, which are episodes not based on the manga but created to allow the manga to progress. These fillers can be skipped or watched depending on personal preference.

Naruto Shippuden Series Overview

Naruto Shippuden continues the story several years after the original series, featuring 500 episodes that cover more mature themes and complex characters. It follows Naruto's growth and the escalating conflicts with powerful enemies. Like the original series, Shippuden contains a significant number of filler episodes, which affect the overall narrative flow.

Recommended Naruto Watch Order

Choosing the right watch order significantly enhances the viewing experience. Reddit communities have widely discussed various approaches, from watching in release order to skipping fillers or following a manga-canon-only path. The most recommended order balances story comprehension and pacing while minimizing filler distractions.

Release Order

The simplest method is to watch Naruto and Naruto Shippuden in their original broadcast order. This includes all episodes, fillers, and movies as they were released. Watching in release order preserves the original viewing experience but may include many filler episodes that some viewers find unnecessary.

Manga-Canonical Order

This approach involves watching only the episodes that follow the manga storyline, skipping fillers entirely. It allows for a more focused narrative and faster progression through the series. Reddit users often share detailed filler lists to help viewers identify which episodes to skip, improving viewing efficiency without losing critical plot points.

Hybrid Watch Order

A compromise between release and manga-canonical orders, the hybrid method recommends watching essential filler episodes that add character development or side stories, while skipping those deemed irrelevant. This method is popular for maintaining story depth without the slower pacing caused by excessive fillers.

Handling Fillers and Canon Episodes

Fillers are a significant aspect of Naruto's episode count and often a point of contention among viewers. Understanding which episodes are filler and how they impact the story is critical in any watch guide.

What Are Fillers?

Fillers are episodes or arcs created by the anime studio that do not appear in the original manga. They serve to prevent the anime from catching up with the manga storyline. While some fillers provide enjoyable side stories and character insights, others are considered irrelevant or lower quality.

Identifying Fillers

Reddit communities have curated comprehensive lists of filler episodes for both Naruto and Naruto Shippuden. These lists categorize fillers by arc and provide recommendations on whether to watch or skip them. Utilizing these resources helps streamline the viewing experience.

Impact of Fillers on the Viewing Experience

Skipping fillers generally results in a faster-paced and more coherent storyline, while watching some filler arcs can enhance character backgrounds and world-building. The choice depends on the viewer's preference for depth versus pace.

Watching Naruto Movies

Naruto movies complement the main series by expanding the universe and exploring additional adventures. However, not all movies fit neatly into the series timeline, creating confusion about when to watch them.

Movie Chronology and Placement

Most Naruto movies are standalone stories or alternate timelines, though some align with specific points in the series. Reddit guides suggest watching movies after completing certain arcs to avoid spoilers and maintain narrative consistency.

Recommended Movie Watch List

- Naruto the Movie: Ninja Clash in the Land of Snow – after episode 101 of Naruto
- Naruto the Movie: Legend of the Stone of Gelel – after episode 160 of Naruto
- Naruto the Movie: Guardians of the Crescent Moon Kingdom – after episode 196 of Naruto
- Naruto Shippuden the Movie – after episode 32 of Shippuden

- Naruto Shippuden the Movie: Bonds – after episode 71 of Shippuden
- Naruto Shippuden the Movie: The Will of Fire – after episode 126 of Shippuden
- Naruto Shippuden the Movie: The Lost Tower – after episode 175 of Shippuden
- Naruto Shippuden the Movie: Blood Prison – after episode 221 of Shippuden
- Naruto Shippuden the Movie: Road to Ninja – after episode 271 of Shippuden
- The Last: Naruto the Movie – after episode 493 of Shippuden

Exploring Naruto Shippuden

Naruto Shippuden is the continuation of Naruto's story, focusing on more intense battles and the maturing of characters. Due to its length and filler episodes, a structured watch approach is particularly beneficial.

Key Arcs in Shippuden

The series is divided into several major story arcs, including the Kazekage Rescue Mission, Sasuke Pursuit, Pain's Assault, and the Fourth Great Ninja War. These arcs form the backbone of the narrative and are essential viewing for understanding the series' climax.

Filler Arcs in Shippuden

Significant filler arcs such as the Twelve Guardian Ninja and the Paradise Life on a Boat arc can be skipped without losing plot continuity. Reddit watch guides provide detailed advice on which filler arcs to avoid and which to consider for deeper character exploration.

Post-Shippuden: Boruto and Beyond

After Naruto Shippuden, the story continues with Boruto: Naruto Next Generations, focusing on the next generation of ninjas. Although not part of the original Naruto storyline, Boruto is essential for fans interested in the extended universe.

Boruto Series Overview

Boruto follows Naruto's son and his friends, blending new characters with familiar faces from the original series. The series is ongoing and features both manga-canon and filler episodes, requiring a similar watch strategy as Naruto.

Watching Boruto After Naruto

Reddit communities recommend completing Naruto Shippuden before starting Boruto to fully appreciate character development and world-building. Boruto offers fresh storylines while honoring its roots, making it a valuable continuation for fans.

Frequently Asked Questions

What is the best Naruto watch order recommended on Reddit?

The most recommended Naruto watch order on Reddit is to start with Naruto (episodes 1-135), then watch Naruto Shippuden (episodes 1-500), followed by the Boruto series if interested in the sequel.

Are there any Naruto filler episodes I can skip according to Reddit guides?

Yes, Reddit users often suggest skipping filler arcs like the 'Land of Tea Escort Mission' (Naruto episodes 102-106) and 'Power' arc (Naruto Shippuden episodes 290-295) to focus on the main storyline.

Should I watch Naruto movies before or after the main series as per Reddit advice?

Reddit generally advises watching Naruto movies after the main series, as most movies are non-canonical or side stories that won't affect the main plot understanding.

Is Naruto Shippuden a continuation or a reboot according to Reddit discussions?

According to Reddit, Naruto Shippuden is a direct continuation of the original Naruto series, picking up two and a half years after the original series ends.

How long does it take to watch Naruto and Naruto Shippuden based on Reddit watch guides?

Reddit users estimate it takes roughly 500-600 hours to watch Naruto and Naruto Shippuden combined, including fillers; focusing only on canon episodes reduces this time significantly.

Are there any recommended Reddit threads for detailed

Naruto watch guides?

Yes, subreddits like r/Naruto and r/anime often have pinned or frequently updated watch guides that include filler lists, watch orders, and episode recommendations.

What is the consensus on watching Boruto after Naruto on Reddit?

Reddit users generally recommend watching Boruto only after completing Naruto and Shippuden to fully appreciate character development and plot references.

Can I watch Naruto Shippuden without watching the original Naruto series according to Reddit?

Most Reddit users advise watching the original Naruto series first as it provides essential character backstory and context needed to understand Naruto Shippuden.
