For 6th graders, the EOG tests typically cover mathematics, reading, and science. These assessments are aligned with the North Carolina Standard Course of Study and are designed to evaluate students' understanding and mastery of grade-level content. The results of these tests play a significant role in informing instruction, guiding academic interventions, and assessing school performance.

Purpose and Format of the EOG Tests

The primary purpose of the NC 6th grade EOG assessments is to gauge students' academic progress and readiness for the next grade level. The tests are usually administered at the end of the school year and include multiple-choice questions, open-ended responses, and technology-enhanced items. The format helps

evaluate critical thinking, problem-solving skills, and content knowledge. Understanding the structure of these assessments aids students in becoming comfortable with test expectations and time management.

Grading and Reporting

Scores from the NC 6th grade EOG tests are reported as scaled scores and performance levels, ranging from Level 1 (not proficient) to Level 4 (above grade level).
