Key Concepts in Microeconomic Theory

Microeconomic theory encompasses several key concepts, including:

1. **Supply and Demand:** The foundational model that describes how prices are determined in a market based on the willingness of consumers to buy and producers to sell.
2. **Elasticity:** Measures how much the quantity demanded or supplied responds to changes in price or income.
3. **Utility Maximization:** Explores how consumers make choices to maximize their satisfaction or utility.
4. **Cost Minimization:** Examines how firms can produce goods at the lowest possible cost.
5. **Market Structures:** Analyzes different types of market environments, including perfect competition, monopoly, monopolistic competition, and oligopoly.
