Background and Development of the Series

Oliver Stone's Untold History of the United States originated from his desire to present a more nuanced and critical perspective on American history than typically found in textbooks and popular media. The series was developed in collaboration with historian Peter Kuznick, who brought academic rigor and extensive research to the project. Together, they sought to create a documentary that not only recounts events but also questions the motivations and consequences of U.S. policies throughout the twentieth century. The series was released between 2012 and 2013 and consists of multiple episodes covering a broad timeline, from World War II to the early 21st century. This collaboration between a filmmaker and a historian was instrumental in shaping the documentary's unique approach and voice.

Origins and Inspiration

The idea for the series was inspired by Oliver Stone's interest in history and his dissatisfaction with conventional accounts that often glorify American actions while downplaying or ignoring problematic aspects. Stone's previous films, such as JFK and Nixon, showcased his inclination toward examining political power and historical controversy, setting the stage for this more comprehensive endeavor. The Untold History project was conceived as a corrective to what Stone and Kuznick viewed as historical omissions and distortions.

Collaboration with Historian Peter Kuznick

Peter Kuznick, a professor of history and director of the Nuclear Studies Institute at American University, provided the scholarly backbone for the series. His expertise in U.S. foreign policy and nuclear history enriched the documentary's content, ensuring that it was both engaging and factually grounded. Kuznick's research helped to uncover documents and perspectives that challenged the

dominant historical narratives, contributing to the series' critical tone and depth.
