In this article, we will explore the features, setup process, programming instructions, troubleshooting tips, and maintenance of the Orbit Model 26622, enabling you to make the most of your irrigation system.

## Overview of the Orbit Model 26622

The Orbit Model 26622 is a digital irrigation timer that simplifies the process of watering your garden. It is designed to control multiple zones of irrigation systems, making it suitable for various garden sizes. Key features of the Orbit 26622 include:

- Digital display for easy programming
- Multiple watering schedules for different plants
- Rain delay feature to conserve water
- Manual watering options
- Battery backup to retain settings

This innovative timer not only saves water but also promotes healthier plant growth by ensuring consistent watering patterns.

## Setting Up the Orbit Model 26622

Setting up the Orbit Model 26622 can be accomplished in a few simple steps. Here's how to get started:

### 1. Gather Required Materials

Before you begin, make sure you have the following items:

- Orbit Model 26622 irrigation timer
- Compatible hoses or irrigation system
- Water source (faucet or hose connection)
- AA batteries (for backup power)

- Tools (if necessary for installation)

## **2. Install the Timer**

To install the timer:

1. Locate the water source where you will connect the timer.
2. Attach the timer directly to the faucet or hose bib.
3. Connect your irrigation system's hose to the output side of the timer.
4. Ensure all connections are secure to prevent leaks.

## **3. Insert Batteries**

To ensure your settings are retained in case of a power outage:

1. Open the battery compartment located on the back of the timer.
2. Insert two AA batteries, ensuring they are oriented correctly as indicated in the compartment.
3. Close the compartment securely.

## **Programming the Orbit Model 26622**

Once the timer is installed, you can program it to suit your watering needs. The programming process can seem daunting at first, but it's straightforward with a little guidance.

### **1. Access the Programming Mode**

To enter the programming mode:

1. Press the "Program" button on the front of the timer. This will bring you to the first watering schedule.
2. Use the arrow keys to navigate through the different schedules (A, B, and C).

### **2. Set the Start Time**

For each schedule:

1. Select the schedule you want to program.
2. Set the start time using the arrow keys. Press "Enter" to confirm.

### **3. Set the Duration**

After setting the start time:

1. Choose how long you want the watering to last (from 1 to 240 minutes).
2. Confirm your selection by pressing "Enter."

## **4. Set the Frequency**

You can choose how often you want the watering to occur:

1. Select the frequency (e.g., daily, every other day, specific days of the week).
2. Confirm your selection.

## **5. Save Your Settings**

Once you have completed programming all desired schedules, press the "Program" button again to save your settings. The timer will now automatically follow the programmed watering schedule.

## **Manual Watering Option**

In addition to the programmed schedules, the Orbit Model 26622 allows for manual watering. This feature is particularly useful for when you want to water specific areas of your garden without altering the existing schedule.

### **1. Access Manual Watering**

To use the manual watering feature:

1. Press the "Manual" button on the timer.
2. Select the zone you wish to water.
3. Set the duration for manual watering.
4. Press "Start" to initiate manual watering.

## **Troubleshooting Common Issues**

Despite its user-friendly design, you may encounter some common issues while using the Orbit Model 26622. Here are solutions to some frequent problems:

### **1. Timer Not Responding**

If the timer does not respond:

- Check the batteries to ensure they are installed correctly and have sufficient charge.
- Ensure the timer is securely connected to the water source.

## 2. No Watering Occurs

If the timer is programmed but no watering occurs:

- Verify that the watering schedule is set correctly.
- Check for blockages or leaks in the irrigation system.
- Ensure the water source is turned on.

## 3. Incorrect Time Display

If the time displayed is wrong:

- Access the time setting mode by pressing the "Clock" button.
- Adjust the time using the arrow keys and confirm your selection.

## Maintenance Tips for the Orbit Model 26622

To ensure the longevity and optimal performance of your Orbit Model 26622, consider the following maintenance tips:

1. Regularly check connections for leaks or wear.
2. Clean the filter screen inside the timer periodically to prevent clogs.
3. Replace batteries annually or as needed to maintain backup power.
4. Protect the timer from extreme weather conditions by placing it in a sheltered location, if possible.
5. Review and adjust watering schedules seasonally based on plant growth and environmental changes.

## Conclusion

The Orbit Model 26622 Manual is an essential guide for homeowners looking to optimize their irrigation systems. By understanding how to set up, program, and maintain this efficient timer, you can enhance your gardening efforts, conserve water, and promote healthy plant growth. With its user-friendly features and reliable performance, the Orbit Model 26622 is an invaluable tool for any garden enthusiast.
