Common Payroll Test Questions

To prepare effectively for payroll evaluations, candidates should familiarize themselves with common test questions. Below are categories of questions along with sample questions and their answers.

1. General Payroll Knowledge

These questions assess a candidate's understanding of payroll processes and terminology.

Question 1: What is the difference between exempt and non-exempt employees?

Answer: Exempt employees are not entitled to overtime pay and typically receive a fixed salary. They

usually hold executive, administrative, or professional positions. Non-exempt employees are entitled to overtime pay for hours worked over 40 in a week, and they are generally paid hourly.

Question 2: What are the main components of an employee's paycheck?

Answer: An employee's paycheck typically includes the following components:

- Gross pay
- Deductions (federal taxes, state taxes, Social Security, Medicare, and any voluntary deductions)
- Net pay

2. Payroll Calculation Questions

These questions test the candidate's ability to perform payroll calculations accurately.

Question 3: If an employee earns a gross pay of \$3,000 and has total deductions of \$600, what is their net pay?

Answer: To calculate net pay, subtract total deductions from gross pay:

Net Pay = Gross Pay - Deductions

Net Pay = \$3,000 - \$600 = \$2,400

Question 4: How do you calculate overtime pay?

Answer: Overtime pay is calculated by taking the employee's regular hourly rate and multiplying it by 1.5 (the overtime rate) for each hour worked over 40 hours in a week. For example, if an employee earns \$20 per hour and works 45 hours, their overtime pay would be calculated as follows:

Regular pay for 40 hours = 40 hours x \$20 = \$800

Overtime pay for 5 hours = 5 hours x (\$20 x 1.5) = \$150

Total Pay = Regular Pay + Overtime Pay = \$800 + \$150 = \$950

3. Tax and Compliance Questions

These questions evaluate the candidate's knowledge of tax regulations and compliance.

Question 5: What are the primary payroll taxes that employers must withhold from employee paychecks?

Answer: Employers must withhold the following primary payroll taxes from employee paychecks:
