Sample Practice Questions and Solutions

Including sample questions with answers is an effective way to illustrate the practical use of the physics 21 study guide.

1. **Question:** Calculate the acceleration of a 5 kg object subjected to a net force of 20 N.

Answer: Using Newton's second law, acceleration $a = F/m = 20 \text{ N} / 5 \text{ kg} =$

4 m/s².

2. **Question:** Determine the frequency of a wave with a wavelength of 0.5 meters traveling at 340 m/s.

Answer: Frequency $f = \text{velocity}/\text{wavelength} = 340 \text{ m/s} \div 0.5 \text{ m} = 680 \text{ Hz}$.

3. **Question:** Find the work done when a force of 10 N moves an object 3 meters in the direction of the force.

Answer: Work $W = \text{force} \times \text{distance} = 10 \text{ N} \times 3 \text{ m} = 30 \text{ Joules}$.
