Understanding Prefixes, Roots, and Suffixes

To effectively use a prefix root word suffix worksheet, it's crucial to understand what these components are:

1. Prefixes

A prefix is a group of letters added to the beginning of a word that alters its meaning. Some common prefixes include:

- un- (not)
- re- (again)
- pre- (before)
- dis- (opposite of)
- mis- (wrongly)

For example, adding the prefix "un-" to the word "happy" creates "unhappy," which means not happy.

2. Root Words

The root word is the core part of a word that carries the primary meaning. It is often derived from another language, such as Latin or Greek. For example, the root word "ject" comes from Latin, meaning "to throw."

Common root words include:

- ject (throw)
- scribe/script (write)
- port (carry)
- vis/vid (see)

Using the root "ject," we can form words like "eject," "project," and "inject."

3. Suffixes

A suffix is a group of letters added to the end of a word, which can change its meaning or grammatical function. Common suffixes include:

- -ing (action or process)
- -ed (past tense)
- -tion (the act of)
- -ful (full of)
