## Key Concepts in Marketing

### 1. The Marketing Mix

The marketing mix, often referred to as the 4Ps, consists of:

- Product: The goods or services offered to meet customer needs.
- Price: The amount of money customers must pay to acquire the product.
- Place: The distribution channels used to deliver the product to consumers.
- Promotion: The communication strategies used to inform and persuade

customers.

This framework helps marketers strategize effectively by balancing these elements to create a cohesive marketing strategy.

- Identifying Segments: Recognizing distinct groups within a market.
