Product Backlog

The Product Backlog is an ordered list of everything that is known to be needed in the product. It is dynamic, constantly evolving to reflect changes in requirements, technology, and market conditions. The Product Owner is responsible for its content, availability, and ordering.

Definition of Done

The Definition of Done is a shared understanding of what it means for work to be complete. It ensures transparency and quality by setting criteria that must be met before product increments can be considered finished. The Product Owner collaborates with the Development Team to define and uphold this standard.

Increment

An Increment is the sum of all the Product Backlog items completed during a Sprint and the value of the increments from all previous Sprints. It must be in usable condition and meet the Definition of Done, ensuring that the product is potentially releasable at the end of each Sprint.
