Amina Wadud is an American scholar of Islam, widely recognized for her pioneering work on gender and the Quran. Born in 1952, she pursued extensive studies in Islamic theology, Arabic, and Quranic studies, eventually earning a PhD focused on the Quranic exegesis related to women. Her academic journey combines traditional Islamic knowledge with contemporary critical theory, enabling her to address complex issues surrounding women's roles in Islam. Wadud's unique position as both a Muslim woman and a scholar has allowed her to engage deeply with Islamic texts, challenging prevailing interpretations that have historically marginalized women.

Feminist Interpretation of the Quran

A central aspect of Amina Wadud's work is her feminist interpretation of the Quran, which seeks to uncover the egalitarian spirit of Islam often obscured by patriarchal cultural influences. Her approach advocates for a reading of the Quran that is context-aware, emphasizing justice, compassion, and equality. She argues that many traditional interpretations reflect the social and historical contexts of male scholars rather than the Quran's original message. This feminist hermeneutics promotes the empowerment of women by revisiting Quranic verses that pertain to gender roles, marriage, inheritance, and leadership.

Methodological Approach

Wadud employs a holistic and linguistic method in her exegesis, focusing on the Arabic language's nuances and the Quran's broader thematic coherence. She insists on understanding the Quranic text within its historical milieu while also interpreting it through the lens of universal human rights and ethics. Her method challenges literalist readings and calls for an interpretive process that is dynamic and responsive to contemporary issues facing Muslim women worldwide.

Spiritual Equality Between Genders
