This article will delve into the features, setup, operation, maintenance, and troubleshooting of the Rock Chucker 2, ensuring you have a comprehensive understanding of this powerful tool.

Overview of the RCBS Rock Chucker 2

The RCBS Rock Chucker 2 is a single-stage reloading press designed to deliver consistency and accuracy in ammunition reloading. Its rugged construction and user-friendly design make it suitable for a wide range of calibers and reloading tasks. Here are some key features:

- **Heavy-Duty Construction:** The Rock Chucker 2 is built from solid materials that provide stability and reduce vibration, ensuring precise reloading.
- **Versatile Use:** This press can accommodate various calibers, from small pistol cartridges to larger rifle rounds.
- **Easy Operation:** The leverage provided by the handle makes resizing brass and seating bullets a breeze, even for larger cartridges.
- **Affordability:** Compared to other reloading presses, the Rock Chucker 2 offers excellent value for its performance and durability.

Setting Up Your RCBS Rock Chucker 2

Proper setup is crucial for ensuring efficient and accurate reloading. Follow these steps to get started with your RCBS Rock Chucker 2:

1. Gather Necessary Tools and Materials

Before you begin the setup process, ensure you have the following items:

- RCBS Rock Chucker 2 press
- Mounting hardware (included with the press)
- Reloading dies for your chosen caliber
- Shell holder
- Powder scale and measure
- Case lube
- Safety glasses and hearing protection

2. Choosing the Right Location

Select a stable and level surface to mount your press. The workbench should be sturdy enough to

handle the force exerted during the reloading process. Additionally, consider the following:

- **Lighting:** Ensure your workspace is well-lit for safety and accuracy.
- **Accessibility:** Place all necessary tools within reach to streamline the reloading process.
- **Ventilation:** If using any chemicals or powders, ensure proper airflow in your workspace.

3. Mounting the Press

Mount the RCBS Rock Chucker 2 securely to your workbench using the provided hardware. Follow these steps:

1. Position the press so that the handle swings freely without obstruction.
2. Use a level to ensure the press is aligned correctly.
3. Secure the press using bolts, making sure it is tightly fastened to prevent any movement during operation.

Operating the RCBS Rock Chucker 2

Once your press is set up, it's time to learn how to operate it. The following sections will guide you through the reloading process.

1. Installing Reloading Dies

To start, you'll need to install the appropriate reloading dies for your caliber:

1. Unscrew the die lock ring and place the die in the press's die holder.
2. Adjust the die until it makes contact with the shell holder when the ram is at the top of its stroke.
3. Secure the lock ring to hold the die in place.

2. Preparing Brass Cases

Before reloading, ensure your brass cases are clean and properly sized. Follow these steps:

- Inspect each case for damage or wear.
- Lubricate your cases with case lube to reduce friction during resizing.
- Resize the cases by inserting them into the shell holder and pulling the handle down to compress the ram.

3. Charging Cases with Powder

Once resized, it's time to charge your cases with powder:

1. Use a powder scale to measure the appropriate amount of powder for your load.
2. Pour the powder into the case using a funnel for accuracy.
3. Double-check the charge to ensure consistency across all cases.

4. Seating Bullets

After charging the cases, you will need to seat the bullets:

1. Insert a bullet into the case mouth.
2. Raise the ram to seat the bullet properly.
3. Adjust the die if necessary to achieve the desired overall length.

Maintenance of the RCBS Rock Chucker 2

Regular maintenance is crucial for ensuring the longevity and functionality of your Rock Chucker 2.

Here are some essential maintenance tips:

- **Clean After Use:** After each reloading session, wipe down the press to remove any debris or residue.
- **Lubricate Moving Parts:** Apply a light machine oil to moving parts to prevent rust and ensure smooth operation.
- **Inspect for Wear:** Regularly check for any signs of wear or damage, especially on the ram and dies.

Troubleshooting Common Issues

Even with proper maintenance, you may encounter some common issues while using your Rock

Chucker 2. Here are some troubleshooting tips:

1. Stuck Cases

If you find that cases are getting stuck in the die:

- Ensure you're using enough case lube.
- Check for any obstructions in the die or shell holder.

2. Inconsistent Powder Charges

If you experience variations in powder charges:

- Double-check your measuring technique.
- Ensure that your powder scale is calibrated and functioning properly.

3. Difficulty Seating Bullets

If bullets are not seating correctly:

- Verify that the die is adjusted properly.
- Check for any debris or damage in the die that may hinder bullet seating.

Conclusion

The RCBS Rock Chucker 2 Manual is not just a guide; it's an invaluable tool for anyone serious about
