Sample IQ Questions and Answers with Explanations

Below are examples of sample IQ questions along with their answers and

detailed explanations to illustrate how to approach and solve them effectively.

Logical Reasoning Sample Question

Question: What comes next in the series: 2, 4, 8, 16, ?

Answer: 32

Explanation: Each number in the series is multiplied by 2 to get the next number. Therefore, $16 \times 2 = 32$.

Verbal IQ Sample Question

Question: Find the word that is a synonym of "Happy".

Answer: Joyful

Explanation: A synonym is a word with a similar meaning. "Joyful" means feeling or expressing great happiness, which is synonymous with "Happy".

Numerical IQ Sample Question

Question: What is the next number in the sequence: 5, 10, 20, 40, ?

Answer: 80

Explanation: The sequence doubles each time: $5 \times 2 = 10$, $10 \times 2 = 20$, and so on. Hence, $40 \times 2 = 80$.

Spatial IQ Sample Question

Question: Identify the shape that completes the pattern.

Explanation: Spatial reasoning questions often require mental rotation or pattern recognition. Visualizing the sequence and identifying the missing element is key to answering correctly.
